## EXAMINER'S REMARKS

1. The following is an Examiner's Statement of Reasons for Allowance:

The claims are deemed allowable over the prior art of record (particularly JONES '266) in view of Applicant's remarks filed 16 JUN 2005 and because the prior art lacks the recited centrifuge combination and accelerator having a discharge area under the deflector plate or the recited geometry and orientation of the accelerator vanes.

With regard to the claims drawn to the accelerator, the intended cooperation between the accelerator and elements of the centrifuge is considered to breathe life and meaning into the claims to distinguish over the prior art. Accordingly, the intended use clauses in the preambles of the claims drawn to the accelerator are afforded a distinguishing limitation as the bodies of the claims set forth structure of the accelerator member that refers back to and draws life and meaning from the preamble and thus the limitations in the body of the claim are deemed to limit the accelerator to the environment and use specified in the preamble. Furthermore, the preamble is considered to bestow patentable weight to the claim since the language in the bodies of the claims regarding the accelerator depends on the preamble (the environment of the recited centrifuge apparatus) for antecedent basis (*Bell Communications Research, Inc. v. Vitalink Communications Corp.*, 34 USPQ2d 1816, 1820 (Fed. Cir. 1995)).

2. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
